

'THE BOOK THAT SAVES THE WORLD'

FREEDOM: THE END OF THE HUMAN CONDITION

By biologist Jeremy Griffith

- We humans have always been in a race between self-destruction and self-understanding.
- Which means that in a world facing complete breakdown from terrorism, refugee crises, corrupted economies, polarized politics, family disintegration, rampant mental illness and ecological devastation, we have to find the reconciling, psychologically healing explanation of our 'good and evil' stricken HUMAN CONDITION.
- And it is that 11th hour solution that *FREEDOM* presents: the breakthrough biological insight that unravels the mystery behind human behaviour and ends suffering and conflict at its source - providing the much needed road map for the complete transformation of our lives and world.

“Science’s holy grail of insight...Human behavior explained at last...Finally, the redeeming understanding of us...Chapter 1 alone will transform you...This is the book we have been waiting for, it is the book that saves the world.”

Professor Harry Prosen | Former President of the Canadian Psychiatric Association

“Griffith’s work is of immense importance. This is the book all humans need to read for our collective wellbeing.”

Professor Scott D. Churchill | Former Chair, Psychology Department, University of Dallas

“*FREEDOM* provides the necessary breakthrough in the critical issue of needing to understand ourselves.”

Dr David J. Chivers | Anthropologist & former President, Primate Society of Great Britain
