The WORLD TRANSFORMATION MOVEMENT (WTM) is a not-for-profit organisation dedicated to transforming the individual, the human race and thus our world through bringing psychologically relieving biological understanding to the underlying problem in all human affairs of the human condition — which is our species’ extraordinary capacity for what has been called ‘good and evil’. In particular, the WTM recognises the breakthrough biological explanation of the human condition put forward by Australian biologist Jeremy Griffith in his various publications, especially his 2016 book FREEDOM: The End Of The Human Condition. Historic day for humanity

Jeremy Griffith’s world-saving book FREEDOM was launched at the Royal Geographical Society in London on 2 June 2016. In an amazing dialogue, Sir Bob Geldof, who was essentially knighted for his concern for humanity, began the launch by pleading for scientists like Jeremy to save the world. Jeremy then presented that desperately needed scientific solution to the world’s problems, which is the reconciling explanation of our species’ ‘good and evil’ conflicted human condition. In the process Jeremy was also able to explain why the idealistic dogma of Sir Bob’s left-wing philosophy has actually oppressed the search for knowledge and worked against progress to enlightenment.

Watch the presentations of the launch of FREEDOM and also a description of the transformation of the human race.

Read the expanded transcript of these presentations in the book Transform Your Life And Save The World, which is available above and provides the ideal introduction to FREEDOM.
